

## IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

### Monitoring & Reporting Requirements Not Met

The **Town of Milford, NH** water system recently violated a drinking water monitoring requirement. Although this is not an emergency, as our customers, you have a right to know what happened and what we did to correct the situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not your drinking water meets health standards.

During the **Third** quarter of **2015** we did not complete all required monitoring for Total Trihalomethanes and Haloacetic Acids and therefore cannot be sure of the quality of your drinking water during that time.

**What should I do? There is nothing you need to do at this time.**

The table below lists the parameters/contaminants we did not sample, the calendar quarter in which we were supposed to collect the sample, how many samples we were supposed to take, how many samples were actually taken, and the date on which follow-up samples were taken.

Parameters/Contaminant Name	Check one or both	Sampling quarter and year we were required to sample	Number of samples we were required to collect	Number of samples we collected on time	When all samples were (collected)
<i>Total Trihalomethanes</i>	X	Quarter 3	2	0	11/18/15
<i>Haloacetic Acids</i>	X	Quarter 3	2	0	11/18/15

**Steps We Took: The samples were collected on 11/18/15 at the required locations and we anticipate resolving the problem once results are received by the NHDES.**
